THE SCHOOL

The International School of Comics is a digital and figurative art academy focused on providing students with a prominent art-focused curriculum in Comic Art, Illustration, Traditional and Digital Art. With prestigious instructors, students will gain the skills to become professionals and find their artistic souls

The International School of Comics aims to provide students with high-class education and professional specializations in the Visual Arts Industry. With over 35 years of experience in teaching, and graduating exceptional professional artists, the International School of Comics has become one of the most respected art academy's in Europe with world renowned alumni artists working in the Comics Industry, Animation, Motion Pictures, Publishing, Advertising, Design, Illustration, & all creative artistic markets.

The International School of Comics has a result oriented teaching approach which emphasizes a higher value on student progress and individualized instructional methods that allow the student to find, nurture, and shape the true artist inside them.

Our recipe for triumph is achieved through continuously updated curriculums, incorporating the latest news and technology for each specific area of study taught by instructors who are highly experienced and acclaimed in their respective artistic fields.

The overall mission of this proposed institution is to provide an alternative to the traditional 4-year Liberal Arts University or College of Art programs for students who already know that they want to pursue a career in the area of Comics or Illustration.

The International School of Comics is approved to operate by the Private Business and Vocational Schools Division of the Illinois Board of Higher Education.

The International School of Comics is not accredited by a US Department of Education recognized accrediting body.

INTRODUCTION

The school was founded by an Italian comic illustrator Dino Caterini over 37 years ago after he had enormous difficulty finding artists to assist him in the many projects that he was offered. He saw a great market demand and realized that existing art schools were not training students adequately for careers in this artistic genre. As a result, he developed training programs for young artists so that he could then put them to work at his studio. Hence, the ISC was started in Rome, Italy and today lists 9 schools in major Italian cities. The school's tested and successful programs that begin in 1979 have enabled students to pursue a career in Comics or Illustration throughout Europe and the United States.

The 3-year program is based on the belief that precocious talent can become extraordinary if encouraged, nurtured, and developed through exposure to demanding and successful artist/teachers, rigorous skill development, and a lot of individual attention in small, studio classes with a maximum of 15 to 18 students.

Additionally, in contrast to the traditional U.S. programs which usually only offer Masters Level classes to graduate or advanced students, we expose students early to Master classes that are taught in attractively priced workshop formats, taught by well established, outstanding national and international artists.

The curriculum developed over the last 37 years has proven that this approach achieves a highly personalized, distinctive style. We do not promise students a brilliant career because success is a result of variables which also rely upon their motivation, personalities, and individual objectives; but we do promise that they will have superior education in the areas essential to attain success in the Comics and Illustration marketplace in America and abroad. Our school does not only boast alumni that have gone on to successful careers, we also put our prospective students in direct contact with them so that they can receive first-hand accounts of how the school's curriculum provided the right preparation for the job market. Our faculty is made up of successful, established, working artists who teach exclusively at our school because they want to help young artists develop.

ADMISSION CRITERIA

Program advisement and campus tours are available daily. For career programs, International School of Comics seeks students who have a true desire to receive practical career preparation in their chosen field and who have the ability to achieve academic success. Although pre-possessed skills are important, of equal importance is a student's desire to succeed in their chosen career field. To ensure proper consideration, students need to enroll early.

International School of Comics welcomes initial inquiries from high school students currently in their junior year (with parental consent). Admissions staff is available during business hours for career planning. Additionally, instructors and staff assist students in career development throughout their enrollment at ISC.

Applicants must be 18 years of age and provide to The International School of Comics administration a proof of graduation from an accredited high school or satisfactory completion of a G.E.D. examination. Any applicant under 18 years of age must have parental or guardian consent to enroll. Upon enrollment both the parent/guardian and the student must be present to sign the enrollment agreement.

All applicants must also schedule an in-person interview with ISC admission's department and complete an Application for Enrollment prior to being accepted. Their application must also include a portfolio containing samples of their art work to show their level of skills prior to accepting them into the program. Once the prospective student's art work has been reviewed a one-on-one interview is conducted with the School Director, to ensure all expectations and needs are communicated and agreed upon. If the sample provided doesn't meet the standards of the International School of Comics the prospective student will be encouraged to participate in workshops and/or private tutoring, offered by the school. These extracurricular programs are created to help develop skills levels of its participants.

THE CURRICULUM

At the current time The International School of Comics is offering the following Programs:

1. **COMIC ART PROGRAM**
2. **ILLUSTRATION PROGRAM**

COMIC ART PROGRAM

Commercial and Advertising Art 50.0402

The Comic Art Program is intended to provide students with the professional skills necessary to be marketable on the national and international publishing market. Starting with basic drawing, students will be able to extend and improve their abilities with respect to narration, direction, graphic and illustration techniques, both analogical and digital. They will be confronted with different styles in the publishing sectors, in order to acquire the skill sets that will make them marketable, but most importantly they will develop a highly individual, distinctive style that demonstrates a mature and confident artist of this genre.

First Year

A strong focus on Anatomy and Perspective Model Building and then moves to Scenography, Storytelling, Analysis/ Reading of the Scene, Character Study, and ends with Comic Panels based on Scripts, Storyboard of Pages and Stage Direction.

Second Year

This starts with Inking Techniques and Color Theory and then moves to Setting/Environment and Architectural Structure, Panel/Board architecture and graphics of the page, Story and Screenwriting and ends with a study of the Author's Role and Elements of Iconographic Research, Model Sheets with details, appearances, poses and gestures of characters, Stage Direction and Narrative Genres and Documentation, including Historical, Horror, Fantasy, Sci-Fi.

Third Year

The techniques for the realistic curriculum includes the study of various comic markets throughout the world and concentrates on the realization of projects that allow the student to familiarize themselves with the professional marketplace. Subjects include: Grotesque – Humor genre which encompasses Non--covering and Covering Coloring Techniques (Acrylic and Tempera), Digital Coloring (Photoshop CS6), and publishing markets in North/South America, France, Japan, Italy, and Spain. The course ends with Storytelling and Direction. In this year we also have a strengthening of marketable job skills: resumes, cover letters, CVs, artist branding and the like.

Upon completion of this course, students will be able to extend and improve their abilities with respect to narration, direction, graphic and illustration techniques, both analog and digital. They will be confronted with different styles in the publishing sectors, in order to acquire the skill sets that will make them marketable, but most importantly they will demonstrate a highly individual, distinctive style that demonstrates a mature and confident artist of this genre.

ILLUSTRATION PROGRAM

Illustration 50.0410

The Illustration Program teaches students to form a professional artist profile, an illustrator capable to translate concepts into images and ideas, able to create new languages creatively and conceptually, and to design innovative styles of visual expressions.

With a vast and advanced art curriculum engaged on the knowledge of both traditional and modern techniques, the Illustration program allows students into the world of the most powerful and versatile medium for artistic communication. Many industries including publishing, literature, newspapers, television, advertising, websites and more employ illustrators as a medium of visual communication through diverse artistic techniques and adopting multiple graphic solutions.

This program allows students to analyze and apply the creative process and its expressive graphic communication, using the most innovative and technological practices of contemporary media. Students will find guidance through theoretical and practicing demonstrations to achieve an individual communicative artistic voice and handle different styles in specific areas.

This program is intended to provide students with the portfolio and professional skills necessary to be successful on the national and international publishing market.

First Year

Strong focus on Anatomy, Drawing from Live Models, and Perspective and then moves to Light and Color Theory, Psychology of Color, Pencil and Ink Techniques, Color Pencil.

Second Year

Builds on and strengthens Anatomical and Perspective skills and adds Watercolor and Tempera, Fabric Treatment, Structure of Illustration for Children's Stories, Historical Themes ranging from the 1200's up to Futuristic (year 3000), and ends with appreciation for specific age groups (pre-school, Elementary, Middle- School, Adolescent, Young Adults, Adults).

Third Year

Builds on and strengthens Watercolor and Tempera techniques and adds Oil, then moves to Structure of Non-fiction, Range of Applications of Nonfiction, and Computer-Assisted Illustration w/ Photoshop for Artists and ends with extensive research into use of Mixed Media, in order to expose the students to many materials and textures. In this year we also have a strengthening of marketable job skills: resumes, cover letters, CVs, artist branding and the like.

Upon completion of this course, students will have acquired a broad range of skill sets that will make them marketable. Most importantly they will demonstrate a highly individual, distinctive style that is indicative of a mature and confident comic artist, as well as instruction and practice of resume building and writing, portfolio construction and upkeep (online and offline) as well as grant writing/proposals and mock interviews.

STUDY ABROAD PROGRAM

The International School of Comics encourages students to expand their education through diverse intellectual perspectives, active participation in a new culture, and critical, firsthand engagement with local and global challenges. The school offers scholarships and exchanges with foreign countries so that students will become more familiar with the idea of working in an international environment. Countries where we have partnerships include Japan, France, Cuba, and Italy.

ACADEMIC CALENDAR

This is a 3 year program and each year is divided into 3 separate terms and each term consists of 12 weeks of instruction & classroom time.

FALL 2016

1st Term Start: Monday, October 3rd, 2016
1st Term End: Thursday, December 22nd, 2016
Holidays: December 23rd, 2016 to January 8th, 2017

WINTER 2017

2nd Term Start: Monday, January 9th, 2017
Spring Break: March 20th, 2017, to March 24th, 2017
2nd Term End: Thursday, April 6th, 2017

SPRING 2017

3rd Term Start: Monday, April 10th, 2017
3rd Term End: Thursday, June 29th, 2017
